State of the Street of Section 1919 (1919) ELECTRICAL SAFETY AND DEVICES

Electrical safety is a vital topic for parents and educators, especially with the growing use of devices like smartphones, laptops, and power banks. Electrical fires are a major risk and are the cause of many deaths and injuries each year. There are reportedly nearly 20,000 accidental fires of electrical origin each year in the UK. This guide offers practical advice to help families and schools prevent electrical hazards, and promote safety when using everyday devices.

CHECK FOR OVERHEATING

smartphones can overheat if used for long periods or when charging. Ensure that children don't use devices on soft surfaces like beds or sofas, which can block ventilation. If a device becomes unusually hot, turn it off and unplug it. unchecked.

INSTALL RESIDUAL CURRENT DEVICES

Ensure that homes and schools are equipped with Residual Current Devices (RCDs) These devices cut off the power if an electrical fault occurs, preventing electric shocks and reducing the risk of fires. RCDs should be tested regularly to ensure they are working properly. More information about RCDs is available from Electrical Safety First.

AVOID OVERLOADING SOCKETS

Plugging too many devices into one socket can overload the electrical system and cause a fire. In schools and homes, ensure extension leads are not overloaded and never 'daisy chain' multiple extension cords together. Educate children on the dangers of connecting too many devices to a single outlet.

POWER BANKS: SAFE USE

charge devices, but they can also pose a risk if misused. Ensure power banks are of high quality and comply with UK safety standards. Teach children never to leave power banks charging unattended, and to avoid placing them under pillows or bedding where they may overheat.

REGULAR DEVICE INSPECTIONS

Regularly check devices for signs of wear and tear. Frayed charging cables, cracked device casings, or devices that are slow to charge may indicate electrical problems. If any issues are noticed, stop using the device until it can be repaired or replaced by a qualified technician. This proactive approach helps prevent fires caused by faulty devices.

UNPLUG DEVICES WHEN NOT IN USE

devices when not in use, particularly overnight. Devices left plugged in unnecessarily can overheat or become fire hazards, especially if left charging unattended for long periods.
Simple habits like unplugging can prevent

USE GENUINE CHARGERS

Always use chargers supplied by the manufacturer or from a reputable retailer. Faulty or counterfeit chargers can cause devices to overheat, short-circuit, or even catch fire. Teach children the importance of avoiding poor-quality chargers, and regularly inspect charging cables for signs of wear or damage. tips on safe charging can be found a Electrical Safety First.

WATER & ELECTRICITY DON'T MIX

Teach children that water and electricity are a dangerous combination. Devices 'should never be used near sinks, bathtubs, or snould never be used near sinks, batritubs, or swimming pools. Parents and educators should ensure that any electrical appliances near water sources have proper waterproof casings and are plugged into RCD-protected outlets.

KEEP DEVICES VENTILATED

Devices need proper ventilation to avoid overheating. Avoid stacking items on top of plugged-in devices like laptops or gaming consoles, and make sure there is enough space around devices to allow for airflow. Proper ventilation helps prevent dangerous heat build-up, reducing the risk of fires

SUPERVISE YOUNG CHILDREN

Younger children may not understand the dangers of electricity, so it's important to supervise them when they are using devices. Keep electrical cords out of reach and always remind children never to put objects into electrical outlets.

Meet Our Expert

James Whelan is an experienced health and safety expert who is a Chartered Member of the Institution of Occupational Safety and Health. He provides services to educational settings as well as many other industries to help them maintain a safe working environment.
